MDN Core Modules: HTML

	Core Modules
	Core Modules
01	Prerequisites
02	Modules
03	Structuring Content with HTML
04	CSS Styling Basics
05	CSS Text Styling
06	CSS Layout
07	Dynamic Scripting with JavaScript
08	JavaScript Frameworks and Libraries
09	Accessibility
10	Design for Developers
11	Version Control
	Core Modules
	Module-01: Structuring Content with HTML
	Basic HTML Syntax
01	What is HTML?
02	Anatomy of an HTML Element
03	Attributes
04	Anatomy of an HTML Document
05	Character References: Including Special Characters in HTML
06	HTML Comments
07	Summary
08	See Also
	What's in the Head? Webpage Metadata
09	What is the HTML Head?
10	Adding a Title
11	Metadata: The <meta> Element
12	Adding Custom Icons to Your Site
13	Applying CSS and JavaScript to HTML
14	Setting the Primary Language of the Document
15	Summary
	Headings and Paragraphs in HTML
16	Headings and Paragraphs
17	Implementing Structural Hierarchy
18	Why do We Need Structure?
19	Active Learning: Giving Our Content Structure
20	Why Do We Need Semantics?
21	Summary
	Emphasis and Importance
22	What are Emphasis and Importance?
23	Active Learning: Let's Be Important
24	Italic, Bold, Underline ...
25	Summary
	Lists
26	Unordered Lists
27	Ordered

28	Active Learning: Marking up Our Recipe Page
29	Nesting Lists
30	Description Lists
31	Test Your Skills
32	Summary
	Structuring Documents
33	Basic Sections of a Document
34	HTML for Structuring Content
35	HTML Layout Elements in More Detail
36	Planning a Simple Website
37	Summary
	Advanced Text Features
38	Quotations
39	Abbreviations
40	Marking up Contact Details
41	Superscript and Subscript
42	Representing Computer Code
43	Marking up Times and Dates
44	Test Your Skills
45	Summary
	Creating Links
46	What is a Hyperlink?
47	Anatomy of a Link
48	A Quick Primer on URLs and Paths
49	Link Best Practices
50	Active Learning: Creating a Navigation Menu
51	Email Links
52	Test Your Skills
53	Summary
	Challenge: Marking up a Letter
54	Starting Point
55	Project Brief
56	Hints and Tips
57	Example
	Challenge: Structuring a Page of Content
58	Starting Point
59	Project Brief
60	Hints and Tips
	HTML Images
61	How Do We Put an Image on a Webpage?
62	Media Assets and Licensing
63	Annotating Images with Figures and Figure Captions
64	CSS Background Images
65	Test Your Skills
66	Summary
	HTML Video and Audio
67	Video and Audio on the Web
68	The <Video> Element
69	Using Multiple Source Formats to Improve Compatibility
70	Other <video> Features
71	The <audio> Element

72	Displaying Video Text Tracks
73	Active Learning: Embedding Your Own Audio and Video
74	Test Your Skills
75	Summary
	Challenge: Mozilla Splash Page
76	Starting Point
77	Project Brief
78	Hints and Tips
79	Example
	HTML Table Basics
80	What is a Table?
81	Active Learning: Creating Your First Table
82	Adding Headers with <th> Elements
83	Allowing Cells to Span Multiple Rows and Columns
84	Summary
	HTML Table Accessibility
85	Recap: Tables for Visually Impaired Users
86	Adding a Caption to Your Table with <caption>
87	Adding Structure with <thead>, <tbody> and <tfoot>
88	The (Scope) Attribute
89	The (Id) and (headers) Attributes
90	Active Learning: Playing with (scope and headers)
91	Summary
	Challenge: Structuring a Planet Data Table
92	Starting Point
93	Project Brief
94	Hints and Tips
95	Example
	Forms and Buttons in HTML
96	Buttons
97	Common Input Types
98	Accessible Forms
99	Other Control Types
100	Client-Side Form Validation
101	The <form> Element
102	Test Your Skills
103	Summary
	Debugging HTML
104	Debugging Isn't Scary
105	HTML and Debugging
106	Permissive Code
107	HTML Validation
108	Using a DOM Inspector
109	Summary

MDN Core Modules: CSS

	Core Modules
	Module-02: CSS Styling Basics
	What is CSS?
01	Browser Default Styles
02	What is CSS for?
03	CSS Syntax Basics
04	How is CSS Applied to HTML?
05	Summary
	Getting Started with CSS
06	Starting with Some HTML
07	Adding CSS to Our Document
08	Using Common Selectors
09	Other CSS Syntax Features
10	Summary
	Challenge: Styling a Biography Page
11	Project Brief
12	Hints and Tips
13	Example
	Basic CSS Selectors
14	What is a Selector?
15	Type Selectors
16	Class Selectors
17	ID Selectors
18	Selector Lists
19	The Universal Selector
20	Summary
	Attribute Selectors
21	Presence and Value Selectors
22	Substring Matching Selectors
23	Summary
	Pseudo-Classes and Pseudo-Element
24	What is a Pseudo-Class?
25	What is a Pseudo-Element?
26	Combining Pseudo-Classes and Pseudo-Elements
27	Generating Content with ::before and ::after
28	Summary
29	See Also
	Combinators
30	Descendant Combinator
31	Child Combinator
32	Next-Sibling Combinator
33	Subsequent-Sibling Combinator
34	Creating Complex Selectors with Nesting
35	Combining Combinators with Selectors
36	Test Your Skills
37	Summary
	The Box Model
38	Block and Inline Boxes

39	Inner and Outer Display Types
40	Examples of Different Display Types
41	What is the CSS Box Model?
42	Playing with Box Models
43	Margins, Padding, and Borders
44	The Box Model and Inline Boxes
45	Using Display: Inline-Block
46	Test Your Skills
47	Summary
	Handling Conflicts
48	Conflicting Rules
49	Understanding Inheritance
50	Understanding the Cascade
51	The Effect of CSS Location
52	Test Your Skills
53	Summary
	CSS Values and Units
54	What is a CSS Value?
55	Numbers, Lengths, and Percentages
56	Color
57	Images
58	Position
59	Strings and Identifiers
60	Functions
61	Test Your Skills
62	Summary
	Sizing Items in CSS
63	The Natural or Intrinsic Size of Things
64	Setting a Specific Size
65	min- and max- sizes
66	Viewport units
67	Test Your Skills
68	Summary
	Backgrounds and Borders
69	Styling Backgrounds in CSS
70	Background Colors
71	Background Images
72	Gradient Backgrounds
73	Multiple Background Images
74	Background Attachment
75	Using the Background Shorthand Property
76	Accessibility Considerations with Backgrounds
77	Borders
78	Rounded Corners
79	Test Your Skills
80	Summary
	Overflowing Content
81	What is Overflow?
82	CSS Tries to Avoid “Data Loss”
83	The Overflow Property
84	Unwanted Overflow in Web Design

85	Test Your Skills
86	Summary
	Images, Media, and Form Elements
87	Replaced Elements
88	Sizing Images
89	Replaced Elements in Layout
90	Form Elements
91	Styling Text Input Elements
92	Normalizing Form Behavior
93	Test Your Skills
94	Summary
	Styling Tables
95	A Typical HTML Table
96	Getting Started with Styling Our Table
97	Spacing and Layout
98	Some Simple Typography
99	Graphics and Colors
100	Styling the Caption
101	Table Styling Quick Tips
102	Test Your Skills
103	Summary
	Debugging CSS
104	How to Access Browser DevTools
105	The DOM Versus View Source
106	Inspecting the Applied CSS
107	Editing Values
108	Adding a New Property
109	Understanding the Box Model
110	Solving Specificity Issues
111	Debugging Problems in CSS
112	Summary
113	See Also
	Challenge: Fundamental CSS Comprehension
114	Starting Point
115	Project Brief
116	Hints and Tips
117	Example
	Challenge: Creating Fancy Letter-Headed Paper
118	Starting Point
119	Project Brief
120	Hints and Tips
121	Example
	Challenge: A Cool-Looking Box
122	Starting Point
123	Project Brief
124	Hints and Tips
125	Example
	Module-03: CSS Text Styling
	Fundamental Text and Font Styling
126	What is Involved in Styling Text in CSS?
127	Fonts

128	Text Layout
129	Font Shorthand
130	Active Learning: Playing with Styling Text
131	Summary
132	See Also
	Styling Lists
133	A Simple List Example
134	Handling List Spacing
135	List-Specific Styles
136	Controlling List Counting
137	Active Learning: Styling a Nested List
138	Summary
	Styling Links
139	Link States
140	Default Styles
141	Styling Links
142	Active Learning: Style Your Own links
143	Including Icons on Links
144	Styling Links As Buttons
145	Summary
	Web Fonts
146	Font Families Recap
147	Web Fonts
148	Active Learning: A Web Font Example
149	Using an Online Font Service
150	@font-face in More Detail
151	Summary
152	See Also
	Challenge: Typesetting a Community School Homepage
153	Starting Point
154	Project Brief
155	Hints and Tips
156	Example
	Module-04: CSS Layout
	Introduction to CSS Layout
157	Normal Layout Flow
158	How are Elements Laid Out by Default?
159	Overriding Normal Flow
160	Summary
	Floats
161	The Background of Floats
162	A (float) Example
163	Clearing (floats)
164	Clearing Boxes Wrapped Around a (float)
165	Test Your Skills
166	Summary
	Positioning
167	Introducing Positioning
168	Static Positioning
169	Relative Positioning
170	Absolute Positioning

171	Fixed Positioning
172	Sticky Positioning
173	Test Your Skills
174	Summary
	Flexbox
175	Why Flexbox?
176	Introducing a Simple Example
177	Specifying What Elements to Lay Out As Flexible Boxes
178	The Flex Model
179	Columns or Rows?
180	Wrapping
181	(Flex-flow) Shorthand
182	Flexible Sizing of (flex) Items
183	Flex: Shorthand Versus Longhand
184	Horizontal and Vertical Alignment
185	Ordering (flex) Items
186	Nested (flex) Boxes
187	Test Your Skills
188	Summary
	CSS Grid Layout
189	What is Grid Layout?
190	Creating Your Grid in CSS
191	Line-Based Placement
192	Positioning with grid-template-areas
193	Nesting grids and subgrid
194	Grid Systems
195	Test Your Skills
196	Summary

MDN Core Modules: Design

	Core Modules
	Module-07: Design for Developers
01	Prerequisites
02	Basic Design Theory
03	User-Centered Design
04	Design Briefs
05	See Also

Full-Stack Development

MDN Extension Modules: Advance JavaScript

	Extension Modules
01	Prerequisites
02	Modules
03	- Advanced JavaScript Objects
04	- Asynchronous JavaScript
05	- Web Forms
06	- Server-Side Website Programming
07	- Client-Side Web APIs
08	- Understanding Client-Side Web Development Tools
09	- Web Performance
10	- Testing
11	- Transform and Animation CSS
12	- Security and Privacy
	Extension Modules
	Module-01: Advanced JavaScript Objects
	Object Prototypes
01	The Prototype Chain
02	Shadowing Properties
03	Setting a Prototype
04	Prototypes and Inheritance
05	Summary
	Object-Oriented Programming
06	Classes and Instances
07	Inheritance
08	Encapsulation
09	OOP and JavaScript
10	Summary
	Classes in JavaScript
11	Classes and Constructors
12	Inheritance
13	Encapsulation
14	Test Your Skills
15	Summary
	Object Building Practice
16	Let's Bounce Some Balls
17	Getting Stared
18	Modeling a Ball in Our Program
19	Animation the Ball
20	Adding Collision Detection
21	Summary
22	See Also
	Challenge: Adding Features to Our Bouncing Balls Demo
23	Starting Point
24	Hints and Tips
25	Project Brief
26	Steps to Complete
	Module-02: Asynchronous JavaScript

	Introducing Asynchronous JavaScript
27	Synchronous Programming
28	A Long-Running Synchronous Function
29	The Trouble with Log-Running Synchronous Functions
30	Event Handlers
31	Callbacks
	Video and Audio APIs (Above)
	How to Use Promises
32	Using the (fetch()) API
33	Chaining Promises
34	Catching Errors
35	Promise Terminology
36	Combining Multiple Promises
37	(async) and (await)
38	Summary
39	See Also
	How to Implement a Promise-based API
40	Implementing an (alarm()) API
41	Using the (alarm()) API
42	Using (async) and (await) with the (alarm()) API
43	See Also
	Introducing Workers
44	Using Web Workers
45	Other Types of Workers
46	Summary
47	See Also
	Challenge: Sequencing Animations
48	Starting Point
49	Project Brief
50	Steps to Complete
	Module-03: Web Forms
	Your First Form
51	What are Web Forms?
52	Designing Your Form
53	Active Learning: Implementing Our Form HTML
54	Basic Form Styling
55	Sending Form Data to Your Web Server
56	Summary
	How to Structure a Web Form
57	The <form> Element
58	The <fieldset> and <legend> Elements
59	The <label> Element
60	Common HTML Structures Used with Forms
61	Test Your Skills
62	Summary
63	See Also
	Basic Native Form Controls
64	Text Input Fields
65	Checkable Items: Checkboxes and Radio Buttons
66	Actual Buttons
67	File Picker

68	Common Attributes
69	Test Your Skills
70	Summary
	The HTML5 Input Types
71	Email Address Field
72	Search Field
73	Phone Number Field
74	URL Field
75	Numeric Field
76	Slider Controls
77	Date and Time Pickers
78	Color Picker Control
79	Test Your Skills
80	Summary
	Other Form Controls
81	Multi-Line Text Fields
82	Drop-Down Controls
83	Other Form Features
84	Test Your Skills
85	Summary
	Styling Web Forms
86	Challenges in Styling Form Widgets
87	Styling Simple Form Widgets
88	A Specific Styling Example
89	Test Your Skills
90	Summary
	Advanced Form Styling
91	Appearance: Controlling OS-Level Styling
92	What Can Be Done About The “ugly” Elements?
93	Summary
	UI Pseudo-Classes
94	What Pseudo-Classes Do We Have Available?
95	Styling Inputs Based On Whether They are Required or Not
96	Using Generated Content with Pseudo-Classes
97	Styling Controls Based On Whether Their Data is Valid
98	Styling Enabled and Disabled Inputs, and Read-Only and Read-Write
99	Radio and Checkbox State – Checked, Default, Indeterminate
100	More Pseudo-Classes
101	Test Your Skills
102	Summary
	Client-Side Form Validation
103	What is Form Validation?
104	Different Types of Client-Side Validation
105	Using Build-in Form Validation
106	Built-in Form Validation Examples
107	Validating Form Using JavaScript
108	Test Your Skills
109	Summary
	Sending Form Data
110	Client/Server Architecture
111	On the Client Side: Defining How to Send the Data

112	On the Server Side: Retrieving the Data
113	A Special Case: Sending Files
114	Security Issues
115	Summary
116	See Also
	Module-04: Server-Side Websites
	Server-Side First Steps
	Introduction to the Server Side
117	What is Server-Side Website Programming?
118	Are Server-Side and Client-Side Programming the Same?
119	What Can You Do On the Server-Side?
120	Summary
	Client-Server Overview
121	Web Servers and HTTP (A Primer)
122	Static Sites
123	Dynamic Sites
124	Web Frameworks Simplify Server-Side Web Programming
125	Summary
	Server-Side Web Frameworks
126	Overview
127	What Can A Web Framework Do for You?
128	How to Select A Web Framework
129	A Few Good Web Frameworks?
130	Summary
	Web Security
131	What is Website Security?
132	Website Security Threats
133	A Few Key Messages
134	Summary
	Express Web Framework (Node.JS)
	Express/Node Introduction
135	Introducing Node
136	Web Frameworks
137	Introducing Express
138	Where Did Node and Express Come From?
139	How Popular are Node and Express?
140	Is Express Opinionated?
141	What Does Express Code Look Like?
142	Summary
	Setting Up a Node Development Environment
143	Express Development Environment Overview
144	Installing Node
145	Using NPM
146	Installing the Express Application Generator
147	Summary
148	See Also
	Express Tutorial: The Local Library Website
149	Overview
150	The LocalLibrary Website
151	I'm stuck, Where Can I Get the Source?
152	Summary

	Express Tutorial Part-2: Creating a Skeleton Website
153	Overview
154	Using the Application Generator
155	Creating the Project
156	Running the Skeleton Website
157	Enable Server Restart on File Changes
158	The Generated Project
159	Challenge Yourself
160	Summary
161	See Also
	Express Tutorial Part-3: Using a Database (with Mongoose)
162	Overview
163	Designing the LocalLibrar Models
164	Mongoose Primer
165	Setting Up the MongoDB Database
166	Install Mongoose
167	Connect to MongoDB
168	Defining the LocalLibrary Schema
169	Testing – Create Some Items
170	Summary
171	See Also
	Express Tutorial Part-4: Routes and Controllers
172	Overview
173	Routes Primer
174	Routes Needed for the LocalLibrary
175	Create the Route-Handler Callback Functions
176	Create the Catalog Route Module
177	Summary
178	See Also
179	Express Tutorial Part-5: Displaying Library Data
180	Overview
181	Displaying Library Data Tutorial Sub-articles
182	Summary
183	See Also
	Express Tutorial Par-6: Working with Forms
184	Overview
185	Express Forms Sub-articles
186	Challenge Yourself
187	Summary
188	See Also
	Express Tutorial Part-7: Deploying to Production
189	Overview
190	What is a Production Environment?
191	Choosing a Hosting Provider
192	Getting Your Website Ready to Publish
193	Example: Hosting on Glitch
194	Example: Hosting on Railway
195	Summary
196	See Also
197	Django Web Framework (Python)

MDN Extension Modules: Advance Client-Side and Security

	Extension Modules
	Module-01: Client-Side Web APIs
	Introduction to Web APIs
01	What are APIs?
02	What Can APIs Do?
03	How Do APIs Work?
04	Summary
	Video and Audio APIs
05	HTML Video and Audio
06	The HTMLMediaElement API
07	Summary
08	See Also
	Drawing Graphics
09	Graphics on the Web
10	Active Learning: Getting Started with a <canvas>
11	2D Canvas Basics
12	Loops and Animations
13	WebGL
14	Summary
15	See Also
16	Example
	Client-Side Storage
17	Client-Side Storage?
18	Storing Simple Data – Web Storage
19	Storing Complex Data – IndexedDB
20	Offline Asset Storage
21	Summary
22	See Also
	Third-Party APIs
23	What are Third Party APIs?
24	Extending the MapQuest Example
25	A RESTful API – NYTimes
26	YouTube Example
27	Summary
	Module-02: Understanding Client-Side Tools
	Client-Side Tooling Overview
28	Overview of Modern Tooling
29	The Modern Tooling Ecosystem
30	How to Choose and Get Help with a Particular Tool
31	Summary
	Package Management Basics
32	A Dependency in Your Project
33	What Exactly is a Package Manager?
34	Package Registries
35	Using the Package Ecosystem
36	A Rough Guide to Package Manager Clients
37	Making Your Own Commands
38	Summary

39	See Also
	Introducing a complete Toolchain
40	Introducing Our Case Study
41	Tools Used in Our ToolChain
42	Toolchains and Their Inherent Complexity
43	Checking Prerequisites
44	Creating a Development Environment
45	Build and Transformation Tools
46	Write the Source Code
47	Running the Transformation
48	Summary
	Deploying Our App
49	Post Development
50	The Build Process
51	Committing Changes to GitHub
52	Using GitHub Actions for Deployment
53	Testing
54	Summary
	Module-03: Transform and Animation CSS
55	Prerequisites
56	Learning Outcomes
57	Guide
58	- Using CSS Transforms
59	- Using CSS Transitions
60	- Using CSS Animations
	Module-04: Security and Privacy
61	Prerequisites
62	Learning Outcomes
63	Resources

Database Design

- Beginning Database Design Solution, Rod Stephens

	Beginning Database Design Solution
	Part-01: Introduction to Database and Database Design
	Goals of Effective Database Design
	Understanding the Importance of Design
	Information Containers
	Strengths and Weakness of Information Containers
	Desirable Database Features
	Summary
	Exercises
	Database Types
	Why Bother?
	Flat Files
	Relational Database
	Spreadsheets
	Hierarchical Database
	XML
	Network
	Object
	Object-Relational
	Exotic
	Summary
	Exercises
	Relational Database Fundamentals
	Relational Points of View
	Table, Rows, and Columns
	Relations, Attributes, and Tuples
	Keys
	Indexes
	Constraints
	Database Operations
	Summary
	Exercises
	Part-02: Database Design Process and Techniques
	Understanding User Needs
	Make a Plan
	Bring a List of Questions
	Meet the Customers
	Learn Who's Who
	Pick the Customers' Brains
	Walk a Mile in the User's Shoes
	Study Current Operations
	Brainstorm
	Look to the Future
	Understand the Customers' Reasoning
	Learning What the Customers Really Need
	Prioritize

	Verify Your Understanding
	Write the Requirements Document
	Make Use Cases
	Decide Feasibility
	Summary
	Exercises
	Translating User Needs into Data Models
	What are Data Models?
	User Interface Models
	Semantic Object Models
	Entity-Relationship Models
	Relational Models
	Summary
	Exercises
	Extracting Business Rules
	What are Business Rules?
	Identifying Key Business Rules
	Extracting Key Business Rules
	Multi-Tier Applications
	Summary
	Exercises
	Normalizing Data
	What is Normalization?
	First Normal Form (1NF)
	Second Normal Form (2NF)
	Third Normal Form (3NF)
	Stopping at Third Normal Form
	Boyce-Codd Normal Form (BCNF)
	Fourth Normal Form (4NF)
	Fifth Normal Form (5NF)
	Domain/Key Normal Form (DKNF)
	Essential Redundancy
	The Best Level of Normalization
	Summary
	Exercises
	Designing Databases to Support Software Applications
	Plan Ahead
	Document Everything
	Consider Multi-Tier Architecture
	Convert Domains into Tables
	Keep Tables Focused
	Use Three Kinds of Tables
	Use Naming Conventions
	Allow Some Redundant Data
	Don't Squeeze in Everything
	Summary
	Exercises
	Common Design Patterns
	Associations
	Temporal Data
	Logging and Locking

	Summary
	Exercises
	Common Design Pitfalls
	Lack of Preparation
	Poor Documentation
	Poor Naming Standards
	Thinking Tool Small
	Not Planning for Change
	Too Much Normalization
	Insufficient Normalization
	Insufficient Testing
	Performance Anxiety
	Mishmash Tables
	Not Enforcing Constraints
	Obsession with IDs
	Not Defining Natural Keys
	Summary
	Exercises
	Part-03: A Detailed Case Study
	User Needs and Requirements
	Meet the Customers
	Pick the Customers' Brains
	Write Use Cases
	Write the Requirements Document
	Demand Feedback
	Summary
	Exercises
	Building a Data Model

Software Architecture and Design

- Fundamentals of Software Architecture: An Engineering Approach, Mark Richards & Neal Ford
- Software Architecture Handbook: Become a Successful Software Architecture by Implementing Effective Architecture Concepts, Joseph Ingeno
- Software Design Methodology: From Principles to Architectural Styles, Hong Zhu
- Learning JavaScript Design Patterns, Addy Osmani

	Fundamentals of Software Architecture: An Engineering Approach
	Introduction
	Defining Software Architecture
	Expectations of an Architect – Topics 4
	Expectations of an Architect – Topics 4
	Intersection of Architecture and... - Topics 4
	Laws of Software Architecture
	Part-01: Foundations
	Architectural Thinking
	Architecture Versus Design
	Technical Breadth
	Analyzing Trade-Offs
	Understanding Business Drivers
	Balancing Architecture and Hands-On Coding
	Modularity
	Definition
	Measuring Modularity – Topics 6
	From Modules to Components
	Architecture Characteristics Defined
	Architectural Characteristics (Partially) Listed – Topics 3
	Trade-Offs and Least Worst Architecture
	Identifying Architectural Characteristics
	Extracting Architecture Characteristics from Domain Concerns
	Extracting Architecture Characteristics from Requirements
	Case Study: Silicon Sandwiches – Topics 2
	Measuring and Governing Architecture Characteristics
	Measuring Architecture Characteristics – Topics 3
	Governance and Fitness Functions – Topics 2
	Scope of Architecture Characteristics
	Coupling and Connascence
	Architectural Quanta and Granularity
	Case Study: Going, Going, Gone
	Component-Based Thinking
	Component Scope
	Architect Role – Topics 2
	Developer Role
	Component Identification Flow – Topics 5
	Component Granularity
	Component Design Discovering Components
	Case Study: Going, Going, Gone: Discovering Components
	Architecture Quantum Redux: Choosing Between Monolithic Versus Distributed Architectures
	Part-02: Architecture Styles

	Foundations
	Fundamental Patterns – Topics 3
	Monolithic Versus Distributed Architectures – Topics 5
	Monolithic Versus Distributed Architectures – Topics 4
	Layered Architecture Style
	Topology
	Layers of Isolation
	Adding Layers
	Other Considerations
	Why Use This Architecture Style
	Architecture Characteristics Ratings
	Pipeline Architecture Style
	Topology – Topics 2
	Example
	Architecture Characteristics Ratings
	Microkernel Architecture Style
	Topology – Topics 2
	Registry
	Contracts
	Examples and Use Cases
	Architecture Characteristics Ratings
	Service-Based Architecture Style
	Topology
	Topology Variants
	Service Design and Granularity
	Database Partitioning
	Example Architecture
	Architecture Characteristics Ratings
	When to Use This Architecture Style
	Event-Driven Architecture Style
	Topology
	Broker Topology
	Mediator Topology
	Asynchronous Capabilities
	Error Handling
	Preventing Data Loss
	Broadcast Capabilities
	Request-Reply
	Choosing Between Request-Based and Event-Based
	Hybrid Event-Driven Architectures
	Architecture Characteristics Ratings
	Space-Based Architecture Style
	General Topology – Topics 5
	Data Collisions
	Cloud Versus On-Premises Implementations
	Replicated Versus Distributed Caching
	Near-Cache Considerations
	Implementation Examples – Topics 2
	Architecture Characteristics Ratings
	Orchestration-Driven Service-Oriented Architecture
	History and Philosophy

	Tropology
	Taxonomy – Topics 6
	Reuse...and Coupling
	Architecture Characteristics Ratings
	Micro services Architecture
	History
	Topology
	Distributed
	Bounded Context
	Granularity
	Data Isolation
	API Layer
	Operational Reuse
	Frontends
	Communication – Topics 2
	Architecture Characteristics Ratings
	Additional References
	Choosing the Appropriate Architecture Style
	Shifting “Fashion” in Architecture
	Decision Criteria
	Monolith Case Study: Silicon Sandwiches – Topics 2
	Distributed Case Study: Going, Going, Gone
	Part-03: Techniques and Soft Skills
	Architecture Decisions
	Architecture Decision Anti-Patterns – Topics 3
	Architecturally Significant
	Architecture Decision Records – Topics 5
	Analyzing Architecture Risk
	Risk Matrix
	Risk Assessments
	Risk Storming – Topics 2
	Agile Story Risk Analysis
	Risk Storming Examples – Topics 3
	Diagramming and Presenting Architecture
	Diagramming – Topics 3
	Presenting – Topics 5
	Making Teams Effective
	Team Boundaries
	Architect Personalities – Topics 3
	How Much Control?
	Team Warning Signs
	Leveraging Checklists – Topics 3
	Providing Guidance
	Summary
	Negotiation and Leadership Skills
