Core Programming

- ➤ Programming in C A Complete Introduction to The C Programming Language, Stephen G. Kochan
- ➤ Object-Oriented Programming with C++, E Balagurusamy

	Object Oriented Programming with C++		Programming in C
	Principles of Object-Oriented Programming		Introduction and Some Fundamentals
01	Software Crisis	01	Programming
02	Software Evolution	02	Higher-Level Languages
03	A Look at Procedure-Oriented Program	03	Integrated Development Environments
04	Object-Oriented Programming Paradigm	04	Operating System
05	Basic Concepts of Object-Oriented Programming	05	Compiling Programs
06	Benefits of OOP	06	Language Interpreters
07	Object-Oriented Languages		Compiling and Running Your First Program
08	Applications of OOP	07	Compiling Your Program
	Beginning with C++	08	Running Your Program
09	What is C++	09	Understanding Your First Program
10	Applications of C++	10	Displaying the Values of Variables
11	A Simple C++ Program	11	Comments
12	More C++ Statements		Variables, Data Types, and Arithmetic Expressions
13	An Example with Class	12	Working with Variables
14	Structure of C++ Program	13	Understanding Data Types and Constants
15	Creating the Source File	14	Working with Arithmetic Expression
16	Compiling and Linking	15	The Assignment Operators
	Tokens, Expression and Control Structures	16	Types _Complex and _Imaginary
17	Introduction		Program Looping
18	Tokens	17	The (for) Statement and Relational Operators
19	Keywords	18	The (While) Statement
20	Identifiers and Constants	19	The (do) Statement
21	Basic Data Types	20	The (break) Statement
22	User-Defined Data Types	21	The (continue) Statement
23	Storage Classes		Making Decisions
24	Derived Data Types	22	The (if) Statement
25	Symbolic Constants	23	The (switch) Statement
26	Type Compatibility	24	Boolean Variables
27	Declaration of Variables	25	The Conditional Operators
28	Dynamic Initialization of Variables		Working with Arrays
29	Reference Variables	26	Defining an Array
30	Operators in C++	27	Initializing Arrays
31	Scope Resolution Operator	28	Character Arrays
32	Member Dereferencing Operators	29	Multidimensional Arrays
33	Memory Management Operators	30	Variable-Length Arrays
34	Manipulators		Working with Functions
35	Type Cast Operator	31	Defining a Function
36	Expressions and Their Types	32	Arguments and Local Variables
37	Special Assignment Expressions	33	Returning Function Results
38	Implicit Conversions	34	Functions Calling Functions Calling
39	Operator Overloading	35	Top-Down Programming
40	Operator Precedence	36	Functions and Arrays
41	Control Structures	37	Global Variables

Accordance Acc		Functions in C++	38	Automatic and Static Variables
The Main Function	42			
44 Function Prototyping 40 A Structure for Storing the Date 45 Call by Reference 41 Functions and Structures 46 Inline Functions 42 Initializing Structures 47 Default Arguments 43 Arrays of Structures 48 Const Arguments 43 Arrays of Structures 49 Recursion 45 Structure Containing Structures 50 Function Overloading 46 Structure Variants 51 Friend and Virtual Functions 47 Arrays of Character Strings 52 Math Library Functions 47 Arrays of Character Strings 53 Introduction 49 Escape Characters 54 CStructures Revisited 50 More on Constant Strings 55 Specifying a Class 92 51 Character Strings, Structures, and Arrays 56 Specifying a Class 92 51 Character Strings, Structures, and Arrays 57 Defining Member Functions 52 Character Strings, Structures, and Arrays 58 Ac++ Program with Class 59 Making an Outside Function Inline 53 Defining a Pointer Variable 59 Arrays within a Class 50 Memory Allocation for Objects 57 Pointers and Structures 50 Arrays within a Class 50 Arrays of Objects 57 Pointers and Arrays 51 Static Data Members 58 Pointers and Structures 52 Static Data Members 58 Pointers and Arrays 53 Private Member Functions 55 Pointers and Arrays 54 Objects as Function Arguments 61 Pointers and Memory Aldocation for Objects 62 Bit Operations on Pointers 55 Pointers and Memory Aldocation for Objects 62 Bit Operations On Bits 56 Returning Objects 62 Bit Operators 57 Constructors 63 Bit Fields 58 Private Constructors 65 The (#include) Statement 67 The (#include) Statement

Database Management System

> Fundamentals of Database Systems, Elmasri and Navathe

	Port 4. Lateral and the Databases
	Part-1: Introduction to Database
	Databases and Database Users
01	Introduction
02	An Example
03	Characteristics of the Database Approach
04	Actors on the Scene
05	Workers behind the Scene
06	Advantages of Using the DBMS Approach
	A Brief History of Database Applications
08	When Not to Use a DBMS
	Database System Concepts and Architecture
09	Data Models, Schemas, and Instances
10	Three-Schema Architecture and Data Independence
11	Database Languages and Interfaces
12	The Database System Environment
13	Centralized and Client/Server Architectures for DBMS
14	Classification of Database Management Systems
	Part-2: The Relational Data Model and SQL
	The Relational Data Model and Database Constraints
15	Relational Model Concepts
16	Relational Model Constraints and Relational Database Schemas
17	Update Operations, Transactions, and Dealing with Constraint Violations
	Basic SQL
18	SQL Data Definition and Data Types
19	Specifying Constraints in SQL
20	Basic Retrieval Queries in SQL
21	INSERT, DELETE, and UPDATE Statements in SQL
22	Additional Features of SQL
	More SQL: Complex Queries, Triggers, and Schema Modification
23	More Complex SQL Retrieval Queries
24	Specifying Constraints as Assertions and Actions as Triggers
25	Views (Virtual Tables) in SQL
26	Schema Change Statements in SQL
	The Relational Algebra and Relational Calculus
27	Unary Relational Operations: SELECT and PROJECT
28	Relational Algebra Operations from Set Theory
29	Binary Relational Operations: JOIN and DIVISION
30	Additional Relational Operations
31	Examples of Queries in Relational Algebra
32	The Tuple Relational Calculus
33	The Domain Relational Calculus
	Part-03: Conceptual Modeling and Database Design
	Data Modeling Using the Entity-Relationship (ER) Model
34	Using High-Level Conceptual Data Models for Database Design
35	A Sample Database Application

36	Entity Types, Entity Sets, Attributes, and Keys
37	Relationship Types, Relationship Sets, Roles, and Structural Constraints
38	Weak Entity Types
39	Refining the ER Design for the COMPANY Database
40	ER Diagrams, Naming Conversions, and Design Issues
41	Example of Other Notation: UML Class Diagrams
42	Relationship Types of Degree Higher than Two
	The Enhanced Entity-Relationship (EER) Model
43	Sub-classes, Super-classes, and Inheritance
44	Specialization and Generalization
45	Constraints and Characteristics of Specialization and Generalization Hierarchies
46	Modeling of UNION Types Using Categories
47	A Simple UNIVERSITY EER Schema, Design Choices, and Formal Definitions
48	Example of Other Notation: Representing Specialization and Generalization in UML Class Diagram
49	Data Abstraction, Knowledge Representation, and Ontology Concepts
	Relational Database Design by ER- and EER-to-Relational Mapping
50	Relational Database Design Using ER-to-Relational Mapping
51	Mapping EER Model Constructs to Relations
	Practical Database Design Methodology and Use of UML Diagrams
52	The Role of Information Systems in Organizations
53	The Database Design and Implementation Process
54	Use of UML Diagrams as an Aid to Database Design Specification
55	Retional Rose: A UML-Based Design Tool
56	Automated Database Design Tools
	Part-4: Object, Object-Retational, and XML: Concepts, Models, Languages, and Standards
	Object and Object-Relational Database
57	Overview of Object Database Concepts
58	Object-Relational Features: Object Database Extensions to SQL
59	The ODMG Object Model and the Object Definition Language ODL
60	Object Database Conceptual Design
61	The Object Query Language OQL
62	Overview of the C++ Language Binding in the ODMG Standard
	XML: Extensible Markup Language
63	Structured, Semi structured, and Unstructured Data
64	XML Hierarchical (Tree) Data Model
65	XML Documents, DTD, and XML Schema
66	Storing and Extracting XML Documents from Databases
67	XML Languages
68	Extracting XML Documents from Relational Databases
	Part-5: Database Programming Techniques
	Introduction to SQL Programming Techniques
69	Database Programming: Techniques and Issues
70	Embedded SQL, dynamic SQL, and SQLI
71	Database Programming with Function Calls: SQL/CLI and HDBC
72	Database Stored Procedures and SQL/PSM
73	Comparing the Three Approaches
	Web Database Programming Using PHP
74	A Simple PHP Example
75	Overview of Basic Features of PHP
76	Overview of PHP Database Programming
	Part-6: Database Design Theory and Normalization

	Basics of Functional Dependencies and Normalization for Relational Databases
77	Information Design Guidelines for Relation Schemas
78	Functional Dependencies
79	Normal Forms Based on Primary Keys
80	General Definitions of Second and Third Normal Forms
81	Boyce-Codd Normal Form
82	Multivalued Dependency and Fourth Normal Form
83	Join Dependencies and Fifth Normal Form
	Relational Database Design Algorithms and Further Dependencies
84	Further Topics in Functional Dependencies: Inference Rules, Equivalence, and Minimal Cover
85	Properties of Relational Decompositions
86	Algorithms for Relational Database Schema Design
87	About Nulls, Dangling Tuples, and Alternative Relational Designs
88	Further Discussion of Multivalued Dependencies and 4NF
89	Other Dependencies and Normal Forms
	Part-7: File Structures, Indexing, and Hashing
	Disk Storage, Basic File Structures, and Hashing
90	Introduction
91	Secondary Storage Devices
92	Buffering of Blocks
93	Placing File Records on Disk
94	Operations on Files
95	Files of Unordered Records (Heap Files)
96	Files of Ordered Records (Sorted Files)
97	Hashing Techniques
98	Other Primary File Organizations
99	Parallelizing Disk Access Using RAID Technologies
100	New Storage Systems
	Indexing Structures for Files
101	Types of Single-Level Ordered Indexes
102	Multilevel Indexes
103	Dynamic Multilevel Indexes Using B-Trees and B+-Trees
104	Indexes on Multiple Keys
105	Other Types of Indexes
106	Some General Issues Concerning Indexing
	Part-8: Query Processing and Optimization, and Database Tuning
	Algorithms for Query Processing and Optimization
107	Translating SQL Queries into Relational Algebra
108	Algorithms for External Sorting
109	Algorithms for SELECT and JOIN Operations
110	Algorithms for PROJECT and Set Operations
111	Implementing Aggregate Operations and OUTER JOINs
112	Combining Operations Using Pipelining
113	Using Heuristics in Query Optimization
114	Using Selectivity and Cost Estimates in Query Optimization
115	Overview of Query Optimization in Oracle
116	Semantic Query Optimization
	Physical Database Design and Tuning
117	Physical Database Design in Relational Databases
118	An Overview of Database Tuning in Relational Systems
	Part-9: Transaction Processing, Concurrency Control, and Recovery

	Introduction to Transaction Processing Concepts and Theory
119	Introduction to Transaction Processing
120	Transaction and System Concepts
121	Desirable Properties of Transactions
122	Characterizing Schedules Based on Recoverability
123	Characterizing Schedules Based on Serializability
124	Transaction Support in SQL
	Concurrency Control Techniques
125	Two-Phase Locking Techniques for Concurrency Control
126	Concurrency Control Based on Timestamp Ordering
127	Multi-version Concurrency Control Techniques
128	Validation (Optimistic) Concurrency Control Techniques
129	Granularity of Data Items and Multiple Granularity Locking
130	Using Locks for Concurrency Control in Indexes
131	Other Concurrency Control Issues
131	Database Recovery Techniques
132	Recovery Concepts
133	NO-UNDO/REDO Recovery Based on Deferred Update
134	Recovery Techniques Based on Immediate Update
135	Shadow Paging
136	The ARIES Recovery Algorithm
137	Recovery in Multi-database Systems
138	Database Backup and Recovery from Catastrophic Failures
130	Part-10: Additional Database Topics: Security and Distribution
	Database Security
139	Introduction to Database Security Issues
140	Discretionary Access Control Based on Granting and Revoking Privileges
141	Mandatory Access Control and Role-Based Access Control for Multilevel Security
142	SQL Injection
143	Introduction to Statistical Database Security
144	Introduction to Flow Control
145	Encryption and Public Key Infrastructures
146	Privacy Issues and Preservation
147	Challenges of Database Security
148	Oracle Label-Based Security
140	Distributed Databases
149	Distributed Databases Distributed Database Concepts
150	Types of Distributed Database Systems
151	Distributed Database Systems Distributed Database Architectures
152	Data Fragmentation, Replication, and Allocation Techniques for Distributed Database Design
153	Query Processing and Optimization in Distributed Databases
154	Overview of Transaction Management in Distributed Databases
155	Overview of Transaction Management in Distributed Databases Overview of Concurrency Control and Recovery in Distributed Databases
156	Distributed Catalog Management
157	Current Trends in Distributed Databases
137	Distributed Databases in Oracle
	Part-11: Advanced Database Models, Systems, and Applications
158	Active Database Concepts and Triggers
159	Temporal Database Concepts
160	Spatial Database Concepts
161	Multimedia Database Concepts
TOT	ividitifficula Database Cuffcepts

162	Introduction to Deductive Databases
	Introduction to Information and Web Search
163	Information Retrieval (IR) Concepts
164	Retrieval Models
165	Types of Queries in IR Systems
166	Text Preprocessing
167	Inverted Indexing
168	Evaluation Measures of Search Relevance
169	Web Search and Analysis
170	Trends in Information Retrieval
	Data Mining Concepts
171	Overview of Data Mining Technology
172	Association Rules
173	Classification
174	Clustering
175	Approaches to Other Data Mining Problems
176	Applications of Data Mining
177	Commercial Data Mining Tools
	Overview of Data Warehouse and OLAP
178	Introduction, Definitions, and Terminology
179	Characteristics of Data Warehouses
180	Data modeling for Data Warehouses
181	Building a Data Warehouse
182	Typical Functionality of a Data warehouse
183	Data Warehouse versus Views
184	Difficulties of Implementing Data Warehouse
	Appendix
185	Alternative Diagrammatic Notations for ER Models
186	Parameters of Disks
187	Overview of the OBE Language
188	Overview of the Hierarchical Data Model
189	Overview of the Network Data Model

Data Structure and Algorithm

- ➤ Classic Data Structures, D. Samanta
- > Introduction to Algorithms, Thomas H. Cormen, Charles E. Leiserson, Ronald, Clifford

	Classic Data Structure
	Introduction and Overview
01	Definitions
02	Concept of Data Structures
03	Overview of Data Structures
04	Implementation of Data Structures
0.	Arrays
05	Definition

197	Defining a Task Network
198	Scheduling
199	Earned Value Analysis
200	Summary
	Risk Management
201	Reactive versus Proactive Risk Strategies
202	Software Risks
203	Risk Identification
204	Risk Projection
205	Risk Refinement
206	Risk Mitigation, Monitoring, and Management
207	The RMMM Plan
208	Summary
	Maintenance and Reengineering
209	Software Maintenance
210	Software Supportability
211	Reengineering
212	Business Process Reengineering
213	Software Reengineering
214	Reverse Engineering
215	Restructuring

216	Forward Engineering
217	The Economics of Reengineering
218	Summary
210	Part-5: Advanced Topics
	Software Process Improvement
219	What is SPI
220	The SPI Process
221	The CMMI
222	The People CMM
223	Other SPI Frameworks
224	SPI Return on Investment
225	SPI Trends
226	Summary
	Emerging Trends in Software Engineering
227	Technology Evolution
228	Observing Software Engineering Trends
229	Identifying 'Soft Trends'
230	Technology Directions
231	Tools-Related Trends
232	Summary
	Concluding Comments
233	The Importance of Software – Revisited
234	People and The Way They Build Systems
235	New Modes for Representing Information
236	The Long View
237	The Software Engineer's Responsibility
238	A Final Comment
	Part-6: Appendix
239	An Introduction to UML
240	Object Oriented Concepts
	SOFTWARE MAINTANANCE

Basic Mathematics

- > Pure Mathematics 1, Sophie Goldie
- > Pure Mathematics 2 and 3, Sophie Goldie

	Pure Mathematics (A-Level)
	P1: Algebra
01	Background Algebra
02	Linear Equations
03	Changing the Subject of a Formula
04	Quadratic Equations
05	Solving Quadratic Equations
06	Equations that cannot be Factorized
07	The Graphs of Quadratic Function
08	The Quadratic Formula
09	Inequalities
	P2: Algebra
10	Operations with Polynomials
11	Solution of Polynomial Equations
12	The Modulus Function
	P3: Further Algebra
13	The General Binomial Expansion
14	Review of Algebraic Functions
15	Partial Functions
16	Using Partial Functions with The Binomial Expansion
	P1: Co-Ordinate Geometry
17	Co-Ordinates
18	Plotting, Sketching and Drawing
19	The Gradient of a Line
20	The Distance Between Two Points
21	The Mid-Point of a Line Joining Two Points
22	The Equation of a Straight Line
23	Finding the Equation of a Line
24	The Intersection of Two Line
25	Drawing Curves
26	The Intersection of A Line and A Curve
	P1: Sequences and Series
27	Definitions and Notation
28	Arithmetic Progressions
29	Geometric Progressions
30	Binomial Expansions
	P1: Functions
31	The Language of Functions
32	Composite Functions
33	Inverse Functions
	P1: Differentiation
34	The gradient of a Curve
35	Finding the Gradient of a Curve
36	Finding the Gradient from First Principles
37	Differentiating by Using Standard Results

38 Using Differentiation	
39 Tangents and Normals	
40 Maximum and Minimum Points	
41 Increasing and Decreasing Functions	
42 Points of Inflection	
43 The Second Derivative	
44 Applications	
45 The Chain Rule	
P2: Differentiation	
46 The Product Rule	
47 The Quotient Rule	
48 Differentiating Natural Logarithms and Exponentials	
49 Differentiating Trigonometrical Functions	
50 Differentiating Functions Defined Implicitly	
51 Parametric Equations	
52 Parametric Differentiation	
P3: Differential Equations	
53 Forming Differential Equations from Rates of Change	
54 Solving Differential Equations	
P1: Integration	
55 Reversing Differentiation	
56 Finding the Area Under A Curve	
57 Area as The Limit of A Sum	
58 Areas Below the X Axis	
59 The Area Between Tow Curves	
60 The Area Between A Curve and the Y Axis	
61 The Reverse Chain Rule	
62 Improper Integrals	
63 Finding Volumes by Integration	
P2: Integration	
64 Integrals Involving The Exponential Function	
65 Integrals Involving The Natural Logarithm Function	
66 Integrals Involving Trigonometrical Functions	
67 Numerical Integration	
P3: Further Integration	
68 Integration by Substitution	
69 Integrals Involving Exponentials and Natural Logarithms	
70 Integrals Involving Trigonometrical Function	
71 The Use of Partial Fractions in Integration	
72 Integration by Parts	
73 General Integration	
P1: Trigonometry	
74 Trigonometry Background	
75 Trigonometrical Functions	
76 Trigonometrical Functions for Angles of any Size	
77 The sine and cosine Graphs	
78 The tangent graph	
79 Solving Equations using Graphs of Trigonometrical Functions	
80 Circular Measure	
81 The Length of An ARC of A Circle	
82 The Area of A Sector of A Circle	

83	Other Trigonometrical Functions
	P2: Trigonometry
84	Reciprocal Trigonometrical Functions
85	Compound-Angle Formulae
86	Double-Angle Formulae
87	The Forms rcos, rsin
88	The General Solutions of Trigonometrical Equations
	P1: Vectors
89	Vectors in Two Dimensions
90	Vectors in Three Dimensions
91	Vectors Calculations
92	The Angle Between Two Vectors
	P3: Vectors
93	The Vector Equation of a Line
94	The Intersection of Two Lines
95	The Angle Between Two Lines
96	The Perpendicular Distance from A Point to a Line
97	The Vector Equation of a Plane
98	The Intersection of A Line and A Plane
99	The Distance of A Point from A Plane
100	The Angle Between A Line and A Plane
101	The Intersection of Two Planes
	P2: Logarithms and Exponentials
102	Logarithms
103	Exponential Functions
104	Modelling Curves
105	The Natural Logarithm Functions
106	The Exponential Function
	P2: Numerical Solution of Equations
107	Interval Estimation – Change-of-Sign Methods
108	Fixed-Point Iteration
	P3: Complex Numbers
109	The Growth of the Number System
110	Working with Complex Numbers
111	Representing Complex Numbers Geometrically
112	Sets of Points in An Argand Diagram
113	The Modulus-Argument form of Complex Numbers
114	Sets of Points Using The Polar Form
115	Working with Complex Numbers in Polar Form
116	Complex Exponents
117	Complex Numbers and Equations

Each Day: 5 Subjects x 3 Topics = 15 Topics		
01	Programming in C	104
	Object-Oriented Programming with C++	172
02	Fundamental of Database System	190
03	Data Structure and Algorithm	92
04	Software Engineering and Maintenance	241
05	Basic Mathematics	118
