Numerical Analysis

> An Introduction to Numerical Methods and Analysis, James F. Epperson

	An Introduction to Numerical Methods and Analysis
	Introductory Concepts and Calculus Review
02	Basic Tools of Calculus – Topics 2
05	Error, Approximate Equality, and Asymptotic Order Notation – Topics 3
06	A Primer on Computer Arithmetic
07	A Word on Computer Language and Software
08	Simple Approximations
09	Application: Approximating the Natural Logarithm
10	A Brief History of Computing
11	Literature Review
12	References
	A Survey of Simple Methods and Tools
13	Horner's Rule and Nested Multiplication
14	Difference Approximations to the Derivative
15	Application: Euler's Method for Initial Value Problems
16	Linear Interpolation
17	Application – The Trapezoid Rule
18	Solution of Tridiagonal Linear Systems
19	Application: Simple Two-Point Boundary Value Problems
	Root-Finding
20	The Bisection Method
21	Newton's Method: Derivation and Examples
22	How to Stop Newton's Method
23	Application: Division Using Newton's Method
24	The Newton Error Formula
25	Newton's Method: Theory and Convergence
26	Application: Computation of the Square Root
27	The Secant Method: Derivation and Examples
28	Fixed-Point Iteration
29	Roots of Polynomials, Part 1
34	Special Topics in Root-finding Methods – Topics 5
35	Very High-order Methods and the Efficiency Index
36	Literature and Software Discussion
37	References
	Interpolation and Approximation
38	Lagrange Interpolation
39	Newton Interpolation and Divided Differences
40	Interpolation Error
41	Application: Muller's Method and Inverse Quadratic Interpolation
42	Application: More Approximations to the Derivative
43	Hermite Interpolation
44	Piecewise Polynomial Interpolation
46	An Introduction to Splines – Topics 2
47	Application: Solution of Boundary Value Problems
48	Tension Splines
49	Least Squares Concepts in Approximation
	The state of the s

112	
111	Literature and Software Discussion References
110	Application: Roots of Polynomials, Part 2
108	An Overview of the QR Iteration
107	Power Methods An Overview of the OR Iteration
106	Reduction to Hessenberg Form
105	Eigenvalue Review Reduction to Hossenberg Form
105	Approximate Solution of the Algebraic Eigenvalue Problem
104	
	References
102	Literature and Software Discussion
101	Application: Numerical Solution of Nonlinear Boundary Value Problems
101	Nonlinear Systems: Newton's Method and Related Ideas – Topics 2
99	Iterative Methods for Linear Systems: A Brief Survey
98	SPD Matrices and the Cholesky Decomposition
97	Perturbation, Conditioning, and Stability – Topics 4
93	The LU Factorization
92	Operation Counts
91	Linear System and Gaussian Elimination
90	Linear Algebra Review
	Numerical Methods for the Solution of Systems of Equations
89	References
88	Literature and Software Discussion
87	Boundary Value Problems – Topics 3
84	Adaptive Solvers
83	Application of Systems of Equations – Topics 2
81	Stability Issues – Topics 2
79	Multistep Methods – Topics 2
77	Single-Step Methods: Runge-Kutta
76	Variants of Euler's Method – Topics 4
72	Analysis of Euler's Method
71	Euler's Method
70	The Initial Value Problem: Background
	Numerical Methods for Ordinary Differential Equations
69	References
68	Literature and Software Discussion
67	Special Topics in Numerical Integration – Topics 4
63	Extrapolation Methods
62	Gaussian Quadrature
61	Application: Stirling's Formula
60	The Midpoint Rule
59	Simpson's Rule and Degree of Precision
58	Improving the Trapezoid Rule
57	A Review of the Definite Integral
	Numerical Integration
56	References
55	Literature and Software Discussion
54	Advanced Topics in Interpolation Error – Topics 3
51	Least Squares Approximation and Orthogonal Polynomials
50	An Introduction to Data Fitting

116	Finite Element Methods for the Diffusion Equation
119	Difference Methods for Poisson Equations – Topics 3
120	Literature and Software Discussion
121	References
	An Introduction to Spectral Methods
122	Spectral Methods for Two-Point Boundary Value Problems
123	Spectral Methods for Time-Dependent Problems
124	Clenshaw-Curtis Quadrature
125	Literature and Software Discussion
126	References
	Appendix: Proofs of Selected Theorems, And Additional Material
128	Proofs of the Interpolation Error Theorems
129	Proof of the Stability Result for ODEs
130	Stiff Systems of Differential Equations and Eigenvalues
131	The Matrix Perturbation Theorem

Software Security

- > Security in Computing, Charles P. Pfleeger, Shari Lawrence Pfleeger, Jonathan Margulies
- > The Web Application Hacker's Handbook: Finding and Exploiting Security Flaws, Dafydd Stuttard

Software Security: Reference 01

	Security in Computing
	Introduction
02	What is Computer Security? – Topics 2
07	Threats – Topics 5
09	Harm – Topics 2
10	Vulnerabilities
11	Controls
12	Conclusion
13	What's Next?
14	Exercises
	Toolbox: Authentication, Access Control, and Cryptography
21	Authentication – Topics 7
25	Access Control – Topics 4
35	Cryptography – Topics 10
36	Exercises
	Programs and Programming
46	Unintentional (Nonmalicious) Programming Oversights – Topics 10
48	Malicious Code – Malware – Topics 2
53	Countermeasures – Topics 5
54	Exercises
	The Web- User Side
56	Browser Attacks – Topics 2
59	Web Attacks Targeting Users – Topics 3
62	Obtaining User or Website Data – Topics 3
67	Email Attacks – Topics 5
68	Exercises
	Operating Systems
73	Security in Operating Systems – Topics 5
82	Security in the Design of Operating Systems – Topics 9
88	Rootkit – Topics 6
89	Conclusion
90	Exercises
	Networks
93	Network Concepts – Topics3
94	Part-1: War on Network: Network Security Attacks
99	Threats to Network Communication – Topics 5
103	Wireless Network security – Topics 4
113	Denial of Service – Topics 10
127	Distributed Denial-of-Service Attacks – Topics 4
128	Part-2: Strategic Defenses: Security Countermeasures
134	Cryptography in Network Security – Topics 6

Intrusion Detection and Prevention Systems — Topics 6	144	Firewalls – Topics 8

Software Security: Reference 02

	The Web Application Hacker's Handbook
	The Web Application Hacker's Handbook Introduction
01	
01	Web Application (In)security
03	The Evolution of Web Applications – Topics 2
08	Web Application Security – Topics 5
09	Summary
	Core Defense Mechanisms
12	Handling User Access – Topics 3
16	Handing User Input – Topics 4
20	Handling Attackers – Topics 4
21	Managing the Application
22	Summary and Questions
	Web Application Technologies
33	The HTTP Protocol – Topics 11
36	Web Functionality – Topics 3
42	Encoding Schemes – Topics 6
43	Next Steps
44	Questions
	Mapping the Application
49	Enumerating Content and Functionality – Topics 5
53	Analyzing he Application – Topics 4
54	Summary and Questions
	Bypassing Client-Side Controls
60	Transmitting Data Via the Client – Topics 6
63	Capturing User Data: HTML Forms – Topics 3
69	Capturing User Data: Browser Extensions – Topics 6
72	Handling Client-Side Data Securely – Topics 3
73	Summary and Questions
	Attacking Authentication
74	Authentication Technologies
87	Design Flaws in Authentication Mechanisms – Topics 13
90	Implementation Flaws in Authentication – Topics 3
98	Securing Authentication – Topics 8
99	Summary
	Attacking Session Management
100	The Need for State – Topics 1
103	Weaknesses in Token Generation – Topics 3
109	Weaknesses in Session Token Handling – Topics 6
112	Securing Session Management – Topics 3
113	Summary and Questions
	Attacking Access Controls
119	Common Vulnerabilities – Topics 6
125	Attacking Access Controls – Topics 6
126	Securing Access Controls – Topics 1
127	Summary and Questions
121	Attacking Data Stores
128	Injecting into Interpreted Contexts – Topics 1
142	Injecting into SQL – Topics 14
142	Injecting into 3QL - Topics 14

148	Injecting into XPath – Topics 5
151	Injecting into LDAP – Topics 3
152	Summary and Questions
	Attacking Back-End Components
159	Injecting OS Commands – Topics 7
161	Manipulating File Paths – Topics 2
165	Injecting into XML Interpreters – Topics 4
167	Injecting into Back-end HTTP Requests – Topics 2
171	Injecting into Mail Services – Topics 4
172	Summary and Questions
	Attacking Application Logic
173	The Nature of Logic Flaws
185	Real-World Logic Flaws – Topics 12
186	Avoiding Logic Flaws
187	Summary and Questions
	Attacking Users: Cross-Site Scripting
190	Varieties of XSS – Topics 3
193	XSS Attacks in Action – Topics 3
196	Finding and Exploiting XSS Vulnerabilities – Topics 3
198	Preventing XSS Attacks – Topics 2
199	Summary and Questions
	Attacking Users: Other Techniques
201	Inducing User Actions – Topics 2
204	Capturing Data Cross-Domain – Topics 3
207	The Same-Origin Policy Revisited – Topics 3
212	Other Client-Side Injection Attacks – Topics 5
221	Local Privacy Attacks – Topics 9
223	Attacking ActiveX Controls – Topics 2
233	Attacking the Browser – Topics 10
234	Summary and Questions
	Automating Customized Attacks
235	Users for Customized Automation
239	Enumerating Valid Identifiers – Topics 4
240	Harvesting Useful Data
241	Fuzzing for Common Vulnerabilities
242	Putting It All Together: Burp Intruder
244	Barriers to Automation – Topics 2
245	Summary and Questions
	Exploiting Information Disclosure
251	Exploiting Error Messages – Topics 6
252	Gathering Published Information
253	Using Inference
256	Preventing Information Leakage – Topics 3
257	Summary and Questions
	Attacking Native Compiled Applications
261	Buffer Overflow Vulnerabilities – Topics 4
264	Integer Vulnerabilities – Topics 3
265	Format String Vulnerabilities – Topics 1
266	Summary and Questions Attacking Application Architecture

268	Tiered Architectures – Topics 2
272	Shared Hosting and Application Service Providers – Topics 4
273	Summary and Questions
	Attacking the Application Server
280	Vulnerable Server Configuration – Topics 7
285	Vulnerable Server Software – Topics 5
286	Web Application Firewalls
287	Summary
	Finding Vulnerabilities in Source Code
289	Approaches to Code Review – Topics 2
299	Signatures of Common Vulnerabilities – Topics 10
303	PHP – Topics 4
304	JavaScript
306	Database Code Components – Topics 2
307	Tools for Code Browsing
308	Summary and Questions
	A Web Application Hacker's Toolkit
311	Web Browsers – Topics 3
314	Integrated Testing Suites – Topics 3
319	Standalone Vulnerability Scanners – Topics 5
323	Other Tools – Topics 4
324	Summary
	A Web Application Hacker's Methodology
325	General Guidelines
331	Map the Application's Content – Topics 6
335	Analyze the Application – Topics 4
338	Test Client-Side Controls – Topics 3
352	Test the Authentication Mechanism – Topics 14
362	Test the Session Management Mechanism – Topics 10
366	Test Access Controls – Topics 4
374	Test for Input-Based Vulnerabilities – Topics 7
381	Test for Function-Specific Input Vulnerabilities – Topics 7
386	Test for Logic Flaws – Topics 5
388	Test for Shared Hosting Vulnerabilities – Topics 2
395	Test for Application Server Vulnerabilities – Topics 7
399	Miscellaneous Checks – Topics 4
400	Follow Up Any Information Leakage
