37	Paired Data
	Visualizing Time Series and Other Functions of an Independent Variable
38	Individual Time Series
39	Multiple Time Series and Does-Response Curves
40	Time Series of Two or More Response Variables
	Visualizing Trends
41	Smoothing
42	Showing Trends with a Defined Functional Form
43	Detrending and Time-Series Decomposition
	Visualizing Geospatial Data
44	Projections
45	Layers
46	Choropleth Mapping
47	Cartograms
	Visualizing Uncertainty
48	Framing Probabilities as Frequencies
49	Visualizing the Uncertainty of Point Estimates
50	Visualizing the Uncertainty of Curve Fits
51	Hypothetical Outcome Plots
	Part-02: Principles of Figure Design
	The Principle of Proportional Ink
52	Visualizations Along Linear Axes
53	Visualizations Along Logarithmic Axes
54	Direct Area Visualizations
	Handling Overlapping Points
55	Partial Transparency and Jittering
56	2D Histograms
57	Contour Lines
	Common Pitfalls of Color Use
58	Encoding Too Much or Irrelevant Information
59	Using Non-monotonic Color Scales to Encode Data Values
60	Not Designing for Color-Vision Deficiency
	Redundant Coding
61	Designing Legends with Redundant Coding
62	Designing Figures Without Legends
	Multi-panel Figures
63	Small Multiples
64	Compound Figures
	Titles, Captions, and Tables
65	Figure Titles and Captions
66	Axis and Legend Titles
67	Tables
	Balance the Data and the Context
68	Providing the Appropriate Amount of Context
69	Background Grids
70	Paired Data
71	Summary
72	Use Large Axis Labels
73	Avoid Line Drawings

	Don't Go 3D
74	Avoid Gratuitous 3D
75	Avoid 3D Position Scales
76	Appropriate Use of 3D Visualizations
	Part-03: Miscellaneous Topics
	Understanding the Most Commonly Used Image File Formats
77	Bitmap and Vector Graphics
78	Lossless and Lossy Compression of Bitmap Graphics
79	Converting Between Image Formats
	Choosing the Right Visualization Software
80	Reproducibility and Repeatability
81	Data Exploration Versus Data Presentation
82	Separation of Content and Design
	Telling a Story and Making a Point
83	What is a Story?
84	Make a Figure for the Generals
85	Build Up Toward Complex Figures
86	Make Your Figures Memorable
87	Be Consistent but Don't Be Repetitive

Software Quality Assurance

	Software Quality Assurance: From Theory to Implementation
	Part-01: Introduction
	The Software Quality Challenge
01	The Uniqueness of Software Quality Assurance
02	The Environments for Which SQA Methods and Developed
03	Summary
	Review Questions
	Topics for Discussion
	What is Software Quality?
04	What is Software?
05	Software Errors Faults and Failures
06	Classification of the Causes of Software Errors
07	Software Quality – Definition
08	Software Quality Assurance – Definition and Objectives
09	Software Quality Assurance and Software Engineering
10	Summary
	Selected Bibliography
	Review Questions
	Topics for Discussion
	Software Quality Factors
11	The Need for Comprehensive Software Quality Requirements
12	Classifications of Software Requirements into Software Quality Factors
13	Product Operation Software Quality Factors
14	Product Revision Software Quality Factors
15	Product Transition Software Quality Factors
16	Alternative Models of Software Quality Factors
17	Who is Interested in the Definition of Quality Requirements?
18	Software Compliance with Quality Factors

	Topics for Discussion

Software Maintenance

	Effective Software Maintenance and Evolution: A Reuse-Based Approach
	Introduction
	Chapter Summary
01	Background
02	The Problem of Software Change
03	Software Evolution and Its Challengers
04	About This Book
	References
	Conventional Methods of Software Maintenance and Evolution
	Static Program Analysis Methods
	Chapter Summary
05	Introduction to Static Program Analysis
06	Approaches to Static Program Analysis
07	How Does an SPA Work?
08	Source Language: SIMPLE
14	Program Design Abstractions for SIMPLE – Topics 6
20	Querying Programs with PQL – Topics 6
21	Design of PQL and SPA
22	Optimizing the Performance of Query Evaluation
23	PQL for COBOL
24	Conclusions
	References
	Reverse Engineering Methods
	Chapter Summary
25	Review of Approaches to Reverse Engineering
26	Incremental and Interactive reverse Engineering Process
27	Recovering Object Models from Code
28	Object recovery Heuristics
29	Semiautomatic Recovery of Abstract Objects as Candidates for Classes
30	A Plan for Semiautomatic Recovery of Abstract Data Types as Candidates for Classes
31	Specifying Reverse Engineering Heuristics in PQL
32	Specifying Object Recovery Heuristics for C Programs
33	Generation of Recovered Design Views in Extended PQL
34	Conclusions
	References
	Model-Based Design for Ease of Maintenance
	Chapter Summary
35	The Role of Models in the Design of Software Tools
36	The concept of Model-Based Design
37	Model-Based PQL Query Validator in SPA and REA
38	Model-Based Design of the PQL Query Evaluator in SPA and REA
45	Model-Based Design of a Software Project-Support Environment – Topics 7
46	Conclusions
	References
	Evolution of Versions and Configuration Management
	Chapter Summary
47	A Working Example: FRS Evolution
48	FRS Component Architecture

49	Evolution of FRS with CVS
50	Reuse of Features Implemented in Past releases When Building New System Releases
51	Adding New Features to a System Release
52	Selective Propagation of New Features to Past Releases
53	The Visibility of Changes During Evolution
54	Explosion of Variant Features and Feature Dependencies
55	Lessons Learned
56	Related Work
57	Conclusions
	References
	Limits of Conventional Techniques
	Chapter Summary
58	Software Complexity Factor
59	Tackling Software Evolution Challenges
60	Conclusions
	References
	Reuse-Based Software Maintenance and Evolution
	The Mixed-Strategy Approach: An Overview
	Chapter Summary
61	Concepts of Reuse-Based Evolution
62	Change-Design versus Design for Change
63	Concepts of the Mixed-Strategy Approach
65	A Preview of the Mixed-Strategy Approach: An Example – Topics 2
66	The Role of Genericity in the Mixed-Strategy Approach
67	Conclusions
	References
	Step-by-Step Introduction to XVCL
	Chapter Summary
68	Salient Features of XVCL
69	Flexible Composition of X-Frames
71	Defining Compositions with XVCL – Topics 2
72	Specifying Small-Granularity Changes
73	Changes at Various Abstraction Levels
74	Defining Generic Structures and Generators
75	Capturing Change Traces and Similarity Patterns in Evolutionary Changes
76	Handling Implementation Dependencies Among Features
84	Summary of XVCL Rules – Topics 8
85	Conclusions
	References
	Software Similarities: Symptoms and Causes
	Chapter Summary
86	The Problem of Software Similarities and Cloning
87	Software Similarities and Reuse
88	Software Similarities and Generic Design
89	Software Similarities, Genericity, and Software Complexity
97	Similarity Patterns in the Buffer Library: An Example – Topics 8
98	Similarity Patterns and Clones in STL
103	Similarity Patterns in Application Programs – Topics 5
104	General Implications
105	Identifying Similarity Patterns and Automated Detection of Clones
106	Conclusions

	References
	The Mixed-Strategy Approach to Generic Design
	Chapter Summary
110	Buffer Library in Java/XVCL Mixed-Strategy Representation – Topics 4
113	Evaluation of the Mixed-Strategy Buffer Library Solution – Topics 3
114	Conclusions
	References
	Evolution with the Mixed-Strategy Approach
	Chapter Summary
115	Introduction
116	Stages of FRS Evolution
117	An Overview of the FRS X-Framework
118	Development of a New System Release
119	Specifying Changes for FRS-DATE
120	Specifying Changes for FRS-USER and FRS-DATE,USER
121	Specifying Changes for FRS-DATE,USER,PREF
122	Specifying Changes for FRS-DATE,USER,PAY
123	Specifying Changes for FRS-DATE,USER,PREF,PAY
124	Specifying Changes for FRS-DATE,USER,PAY,BR
125	Specifying Changes for FRS-DATE,USER,PAY,BR,BRD
126	Specifying Changes for FRS-USER,BR
127	Specifying Changes for FRS-USER-PD,BR
128	Conclusion
	Scaling Up the Mixed-Strategy Approach
	Chapter Summary
129	Introduction
132	Modeling Features Arising During Evolution – Topics 3
133	A Mixed-Strategy Evolution Support Environment (MESE)
134	An FRS Architecture with Connectors
135	Generic Connectors in the FRS X-Framework
136	Comments on X-Framework Organization Principles
137	An Overview of the X-Framework Customization Process
138	Customization and Assembly Passes Over an X-Framework
139	Using the Customization Decision Tree (CDT)
141	Using MESE to Customize and Evolve the FRS X-Framework: An Example – Topics 2
142	Assembly Pass
143	Related Work on Product Line Research
144	Conclusions
	References
	The Mixed-Strategy Approach in Other Projects
	Chapter Summary
145	STL in C++/XVCL
146	DEMS in C#/XVCL
147	Web Portal Product Line in ASP/XVCL
148	CAP-WP in J2EE/XVCL
149	Role-Playing Games (RPG) for Mobile Phones
150	Conclusions
	References
	Other Techniques Related to XVCL
	Chapter Summary
151	Frame Technology

152	Conventional Techniques
153	Generation Techniques
154	Separation of Concerns and Its Relation to Generic Design
155	Conclusions
	References
	Evaluation of the Mixed-Strategy Approach
	Chapter Summary
156	Summary of the Mixed-Strategy Approach
158	The Mixed-Strategy Process – Topics 2
159	Trade-Offs Involved in Applying the Mixed-Strategy Approach
160	XVCL Workbench
	References
	Conclusions
	Appendix

Ordinary Differential Equations

Ordinary Differential Equations: Reference-1

	An Introduction to Ordinary Differential Equations
	Preliminaries
01	Introduction
02	Complex Numbers
03	Functions
04	Polynomials
05	Complex Series and the Exponential Function
06	Determinants
07	Remarks o Methods of Discovery and Proof
	Introduction – Linear Equations of the First Order
08	Introduction
09	Differential Equations
10	Problems Associated with Differential Equations
11	Linear Equations of the First Order
12	The Equation $y' + ay = 0$
13	The Equation $y' + ay = b(x)$
14	The General Linear Equation of the First Order
	Linear Equations with Constant Coefficients
15	Introduction
16	The Second Order Homogeneous Equation
17	Initial Value Problems for Second Order Equations
18	Linear Dependence and Independence
19	A Formula for the Wronskian
20	The Non-Homogeneous Equation of Order Two
21	The Homogeneous Equation of Order n
22	Initial Value Problems for n-th Order Equations
23	Equations with Real Constants
24	The Non-Homogeneous Equations of Order n
25	A Special Method for Solving the Non-Homogeneous Equation
26	Algebra of Constant Coefficient Operators
	Linear Equations with Variable Coefficients
27	Introduction
28	Initial Value Problems for the Homogeneous Equation
29	Solutions of the Homogeneous Equations
30	The Wronskian and Linear Independence
31	Reduction of the Order of a Homogeneous Equation
32	The Non-Homogeneous Equation
33	Homogeneous Equations with Analytic Coefficients
34	The Legendre Equations
35	Justification of the Power Series Method
	Linear Equations with Regular Singular Points
36	Introduction
37	The Euler Equation
38	Second Order Equations with Regular Singular Points – An Example
39	Second Order Equations with Regular Singular Points – The General Case
40	A Convergence Proof
41	The Exceptional Cases

42	The Bessel Equations
43	The Bessel Equation (Continued)
44	Regular Singular Points at Infinity
	Existence and Uniqueness of Solutions to First Order Equations
45	Introduction
46	Equations with Variables Separated
47	Exact Equations
48	The Method of Successive Approximations
49	The Lipschitz Condition
50	Convergence of the Successive Approximations
51	Non-Local Existence of Solutions
52	Approximations to, and Uniqueness of, Solutions
53	Equations with Complex-Valued Functions
	Existence and Uniqueness of Solutions to Systems and n-th Order Equations
54	Introduction
55	An Example – Central Forces and Planetary Motion
56	Some Special Equations
57	Complex n-dimensional Space
58	Systems as Vector Equations
59	Existence and Uniqueness of Solutions to Systems
60	Existence and Uniqueness for Linear Systems
61	Equations of Order n

Ordinary Differential Equations: Reference-2

	Ordinary Differential Equations: An Elementary Textbook for Students of Mathematics and Engineering
	Basic Concepts
01	How Differential Equations Originate
06	The Meaning of the Terms Set and Functions. Implicit and Elementary Functions – Topics 5
09	The Differential Equations – Topics 3
12	The General Solution of a Differential Equation – Topics 3
14	Direction Field – Topics 2
	Special Types of Differential Equations of the First Order
17	Meaning of the Differential of a Function Separable Differential Equations – Topics 3
19	First Order Differential Equation with Homogeneous Coefficients – Topics 2
23	Differential Equations with Linear Coefficients – Topics 4
25	Exact Differential Equations – Topics 2
28	Recognizable Exact Differential Equations Integrating Factors – Topics 3
32	The Linear Differential Equations of the First Order Bernoulli Equation – Topics 4
34	Miscellaneous Methods of Solving a First Order Differential Equation – Topics 2
	Problems Leading to Differential Equations of the First Order
35	Geometric Problems
38	Trajectories – Topics 3
43	Dilution and Accretion Problems – Topics 5
46	Motion of a Particle Along a Straight Line – Vertical, Horizontal, Inclined – Topics 3
48	Pursuit Curves. Relative Pursuit Curves – Topics 2
56	Miscellaneous Types of Problems Leading to Equations of the First Order – Topics 8
	Linear Differential Equations of Order Greater Than One
59	Complex Numbers and Complex Functions – Topics 3
61	Linear Independence of Functions. The Linear Differential Equations of Order n – Topics 2
65	Solution of the Homogeneous Linear Differential Equation of Order n – Topics 4
67	Solution of the Nonhomogeneous Linear Differential Equations of Order n – Topics 2
69	Solution of the Nonhomogeneous Linear Differential Equations by the Method – Topics 2
71	Solution of the Linear Differential Equation with Non-constant Coefficients – Topics 2
	Operators and Laplace Transforms
75	Differential and Polynomial Operators – Topics 4
77	Inverse Operators – Topics 2
80	Solution of a Linear Differential Equation by Means of the Partial Fraction Expansion – Topics 3
85	The Laplace Transform. Gamma Function – Topics 5
	Problems Leading to Linear Differential Equations of Order Two
89	Undamped Motion – Topics 4
91	Damped Motion – Topics 2
93	Electric Circuits. Analog Computation – Topics 2
97	Miscellaneous Types of Problems Leading to Linear Equations of the Second Order – Topics 4
	Systems of Differential Equations. Linearization of First Order Systems
105	Solution of a System of Differential Equations – Topics 8
106	Linearization of First Order Systems
	Problems Giving Rise to Systems of Equations. Special Types of Second Order Linear
109	Mechanical, Biological, Electrical Problems Giving Rise to Systems of Equations – Topics 3
117	Plane Motions Giving Rise to Systems of Equations – Topics 8
120	Special Types of Second Order Linear and Nonlinear Differential Equations Solvable – Topics 3
124	Problems Giving Rise to Special Types of Second Order Nonlinear Equations – Topics 4
	Series Methods

126	Poser Series Solutions of Linear Differential Equations – Topics 2
127	Series Solution of $y' = f(x,y)$
130	Series Solution of a Nonlinear Differential Equations of Order Greater Than One – Topics 3
132	Ordinary Points and Singularities of a Linear Differential Equations – Topics 2
135	The Legendre Differential Equations. – Topics 3
139	The Bassel Differential Equation. – Topics 4
142	The Laguerre Differential Equations – Topics 3
	Numerical Methods
143	Starting Method. Polygonal Approximation
144	An Improvement of the Polygonal Starting Method
146	Starting Method – Taylor Series – Topics 2
147	Starting Method – Runge-Kutta Formulas
149	Finite Differences. Interpolation – Topics 2
152	Newton's Interpolation Formulas – Topics 3
153	Approximation Formulas Including Simpson's and Weddle's Rule
154	Milne's Method of Finding an Approximate Numerical Solution of $y' = f(x, y)$
